The story of the Jacobite rebellions, romanticised in song and felt deeply in the hearts of Scottish people and their descendants all over the world. The story begins with injustice and ends with the destruction of the Scottish Clan system and the virtual destruction of Scottish language, music and culture.

During this story, tens of thousands of Scots are butchered or humiliated and forced to flee from their homes.

But this is also a story of hope and endurance. The whole world has benefited from the emigration of the Scots, forced or otherwise. The Scots, Highland and Lowland, shine in the world because they are tough, determined, inventive, just, honest and loyal.

It is a fire that burns to be Scottish: wherever we are in the world, Scotland is carved into our hearts and etched in our souls forever .....
